

About Users:

The users has different roles and depending on the role, the application will give you access to different components.

About the application:

The app has 2 complete CRUD. Has a CRUD about Stock of products and a CRUD about users.

About the backend:

The backend is with spring boot - spring security and jwt token with role system. The backend has an import.sql with all the data.

About the frontend:

Developed with Vite, React, Redux, Routes, Bootstrap, react-bootstrap, custom css styles, Sweet alert 2.

About the database : MySql.

The home page with login, user admin:

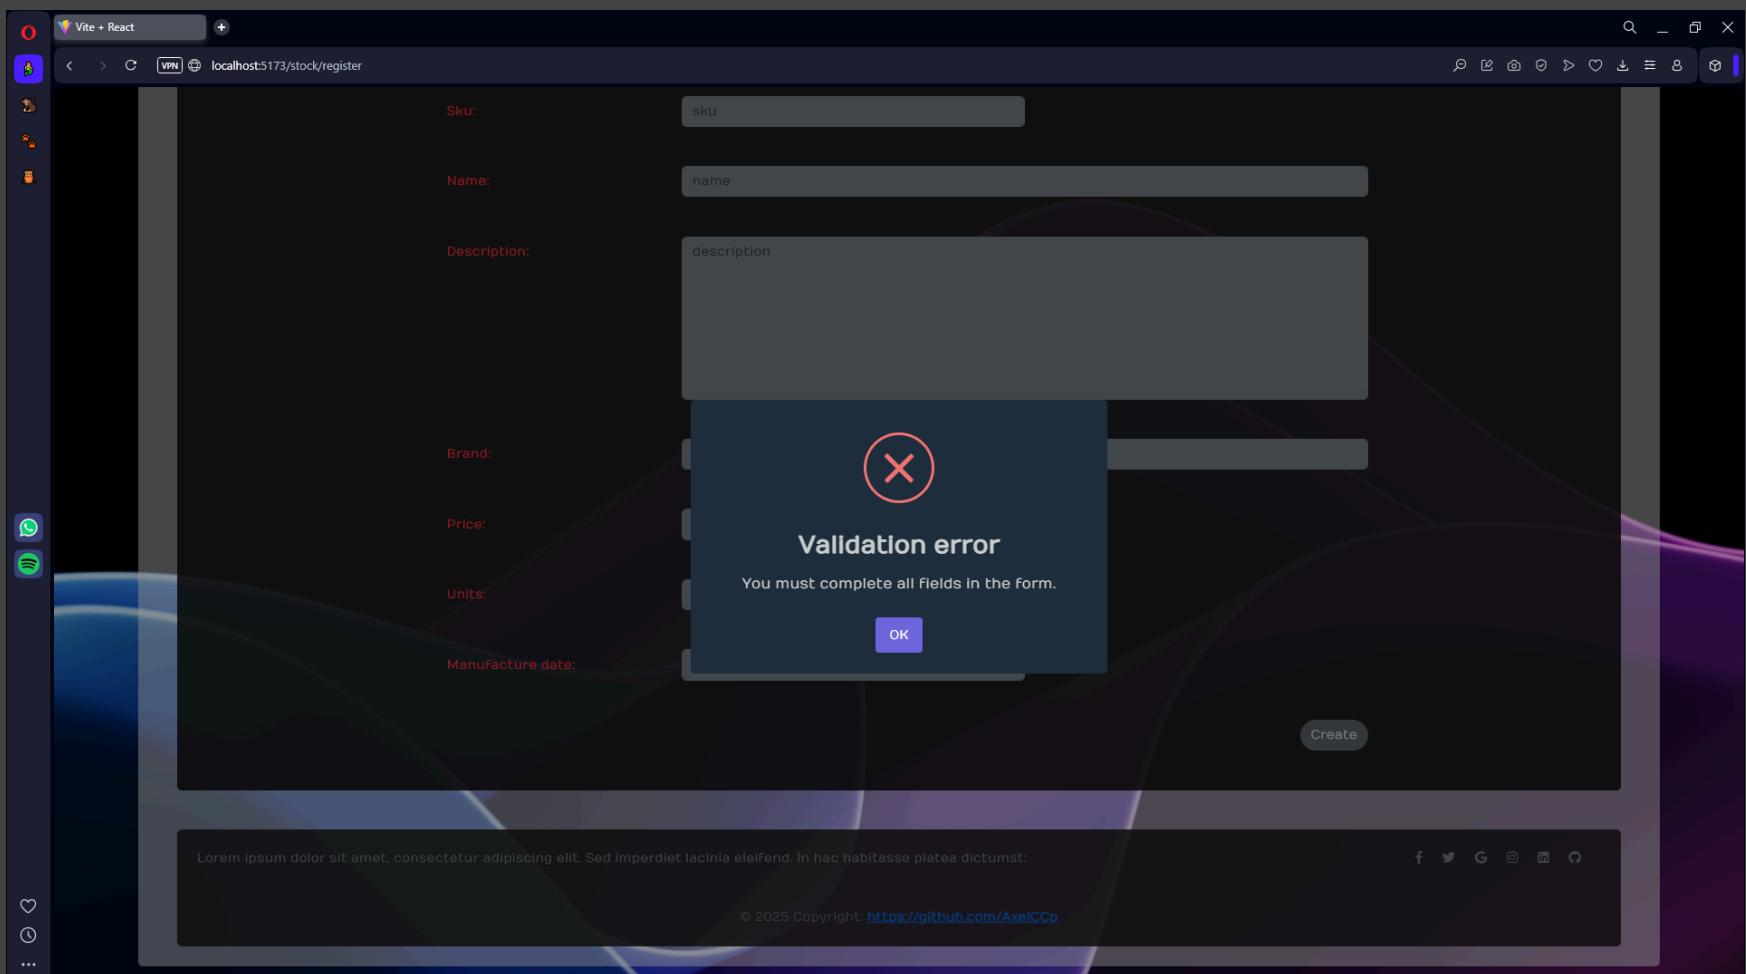

The screenshot shows the 'Stock list' page of the application. The top navigation bar includes the same icons and links as the previous screenshot, plus a dropdown menu labeled 'Admin'. The main content area features a table titled 'Stock list' with the following columns: Id, Sku, Name, Description, Brand, Price, Units, Manufacture date, Update, and Delete. The table lists 12 items, each with a unique ID, SKU, name, and a short description. The 'Brand' column indicates two companies: Capsule Corp and Red Ribbon. The 'Update' and 'Delete' actions for each item are represented by small buttons. The bottom of the page contains the same placeholder text and footer as the previous screenshot.

Create of products / form:

The form of stock and products has front validation with “sweet alert” (the form about users has backend validations).

Product created:

A screenshot of a web browser window titled "Vite + React". The address bar shows "localhost:5173/stock". The main content is a table titled "Stock list" with columns: Id, Sku, Name, Description, Brand, Price, Units, Manufacture date, Update, and Delete. A modal dialog box is centered over the table, displaying a green checkmark icon, the text "Product created", and the message "The product was created successfully!". A blue "OK" button is at the bottom of the modal. A teal arrow points from the left margin towards the modal.

LOREM IPSUM DOLOR SIT AMET, CONSECTETUR ADIPISCING ELIT. SED IMPERDIET LACINIA ELEIFEND. IN HAC HABITASSE PLATEA DICTUMST:

List of users and CRUD

A screenshot of a web application titled "System users list". The application is built using a dark-themed UI framework, likely Material-UI. At the top, there is a navigation bar with icons for React, Vite, and MySQL, followed by links for "Stock list", "Register stock", "User system list", "Create user", "Images", and "Videos". On the right side of the top bar is a user profile icon labeled "Admin". Below the navigation bar, a red banner displays the text "My Full stack app demo 2025 - with Redux!". The main content area features a table with the following data:

Create user / Only the admin can create users and provide a temporary password:

The screenshot shows a web application interface for creating a user. At the top, there's a navigation bar with icons for React, MySQL, and other tools, along with links for Stock list, Register stock, User system list, Create user, Images, and Videos. On the right, there's a dropdown menu for 'Admin'. Below the navigation is a banner that says 'My Full stack app demo 2025 – with Redux!'. The main content area is titled 'User system form'. It contains several input fields: 'Name' (text input 'name'), 'Lastname' (text input 'lastname'), 'Position' (text input 'position'), 'Area' (text input 'area'), 'Email' (text input 'email'), 'Set password' (text input 'password'), and 'Confirm password' (text input 'confirm password'). There are also two checkboxes for roles: 'Admin role' and 'User role'. At the bottom right of the form is a 'Create' button. Below the form, there's a dark panel with some placeholder text and social sharing icons.

Form validations:

"Set password" and "Confirm password" has a frontend validation, and the other inputs has backend validations with spring:

Confirm password validation

This screenshot shows the same user creation form as above, but with validation errors. The 'Set password' field has a red error message '...'. The 'Confirm password' field has a red error message 'Please confirm your password!'. The other fields ('Name', 'Lastname', 'Position', 'Area', 'Email', 'Admin role', and 'User role') appear to be valid. The 'Create' button is still present at the bottom right.

Confirm password validation does not match

This screenshot shows the user creation form again, but with a different validation error. The 'Set password' field has a red error message '.....'. The 'Confirm password' field has a red error message 'The passwords fields does not match!'. The other fields are valid. The 'Create' button is at the bottom right.

The backend validations:

[we can custom the messages from the backend for your application]

A screenshot of a web browser window titled "Vite + React". The URL is "localhost:5173/user-system/form". The form contains fields for Name, Lastname, Position, Area, Email, and two checkboxes for roles: Admin role and User role. Below the form are fields for Set password and Confirm password, both containing four dots. A "Create" button is at the bottom right. Validation errors are displayed below each field: "the field: name The name cannot be empty.", "the field: lastname The lastname cannot be empty.", "the field: position The position cannot be empty.", and "the field: area The area cannot be empty.".

About the roles:

The roles are optional. The admin can update the info more later.

A screenshot of a user creation form showing the "Select roles for the user system" section. It contains two checkboxes: "Admin role" and "User role".

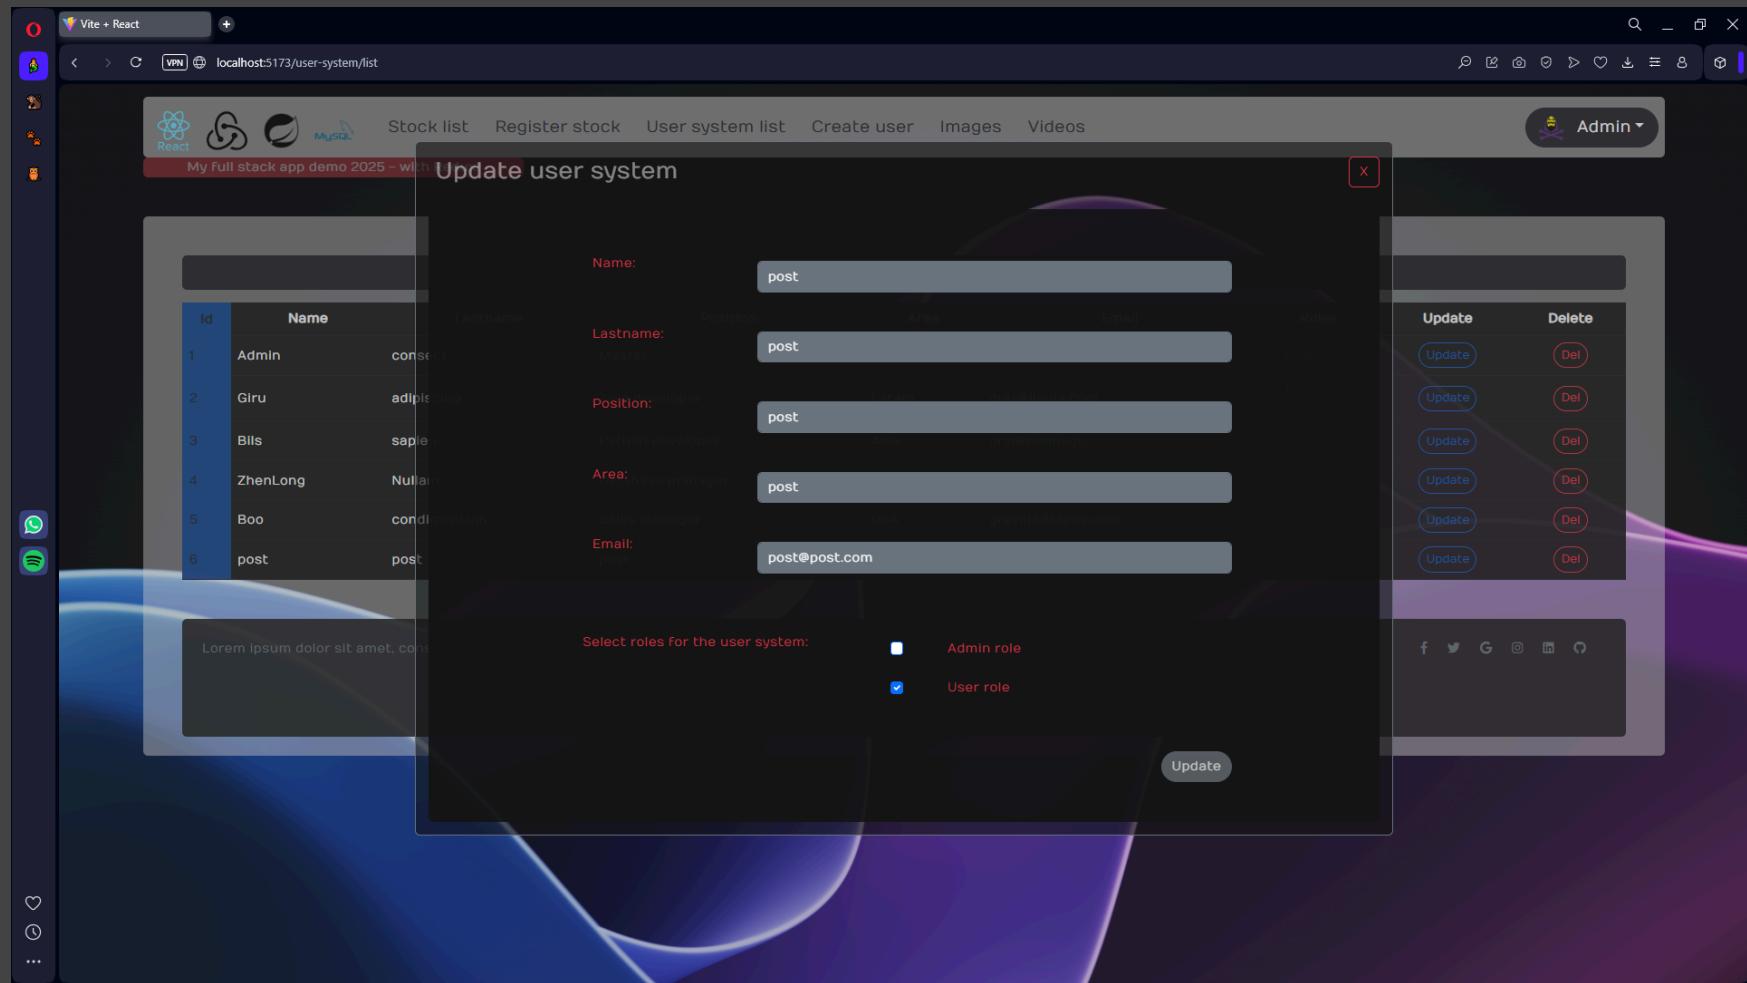

User Created (I forgot to add the sweetalert message XD)

A screenshot of a web browser window titled "Vite + React". The URL is "localhost:5173/user-system/list". The page shows a navigation bar with links for Stock list, Register stock, User system list, Create user, Images, and Videos. A dropdown menu shows "Admin". The main content is a table titled "System users list" with columns: Id, Name, Lastname, Position, Area, Email, Roles, Update, and Delete. The table has six rows. A cyan arrow points to the last row, which has the id "6" and the name "post". This row is circled in cyan. The "Update" and "Delete" buttons for this row are also circled in cyan. At the bottom of the page is a footer with social media icons and the text "© 2025 Copyright: <https://github.com/AxelCCP>".

```

THE BACKEND

The screenshot shows the Visual Studio Code interface with the Java Backend project open. The Explorer sidebar on the left displays the project structure under 'JAVA PROJECTS' for the 'app' module. The terminal at the bottom shows Hibernate SQL queries being executed.

THE FRONTEND

The screenshot shows the Visual Studio Code interface with the React Frontend project open. The Explorer sidebar on the left displays the project structure under 'APP-REACT-V2'. The terminal at the bottom shows Vite update logs.

```
11:59:49 a.m. [vite] (client) hmr update /src/pages/RegisterPage.jsx, /src/pages/StockPage.jsx, /src/components/Stocklist.jsx, /src/components/StockForm.jsx
```

A notification bar at the bottom right indicates that Docker is installed and recommends installing the Docker extension.
